OBJECTIVE

I hold an AEC in Web design and programming from Collège de Maisonneuve, as well as a Certificate in Project Management and a Bachelor's degree in Electronics Engineering. I'm passionate about new information technologies, and I'm looking for a position as a Web developer (Front-end, Back-end, Full-Stack).

FORMATION

AEC in Website Design and Programming

2023

Maisonneuve College, Montreal

Main concepts of the course :

- Communication in a Web project team
- Web Development Environment 1 and 2
- Dynamic Web and Web interface programming 1 and 2.
- Frameworks, Advanced web programming techniques
- Website creation and design, UX/UI design applied to projects, digital media processing

Project Management Certificate

2017

Universidad Pontificia Bolivariana, Colombia

Bachelor's degree in Electronics Engineering

2013

Universidad Pontificia Bolivariana, Colombia

Website design and programming skills acquired

- Involved throughout the process of creating a website and its programming interfaces.
- Estimate projects, plan tasks, design and program interactive interfaces, server functionality, and online databases.

EXPERIENCE

Web developer - Full stack (internship)

Gofbee, Montreal | April 2023 - June 2023

- Design and create databases with MySQL
- Use Laravel to implement back-end functionalities (CRUD).
- Develop and implement unit tests to guarantee code quality and reliability.
- Develop a REST API dedicated to project evaluation and testing.
- Create mock-ups with Figma to visualize and share ideas prior to development.

Store Associate

Dollarama, Laval. | September 2021 - February 2022

- Operate a cash register
- Assist in receiving and stocking merchandise and provide quality customer service.

External Consultant

Consorcio 2018, Colombia | Feb 2018 - Aug 2019

- External consultant for the installation and administration of computer networks for companies and clients in a wide range of sectors.

Project Engineer

G&R Ingeniera, Colombia | February 2017 - November 2017

- Coordinate the installation of systems in a shopping mall (fire network, cameras, sound).
- Supervise a foreman and three technicians.

Data analyst , Microsoft Excel software

Universidad Pontificia Bolivariana, Colombia | May 2013 - May 2015

- Successfully updated and validated university student databases, improving information quality and saving significant resources.

SKILLS

- Web Markup and Styling : **HTML5, CSS, SASS**
- Programming Languages : **Javascript, PHP**
- Databases : **MySQL**
- Web Frameworks and Libraries: **Laravel, React.js, Bootstrap**
- Environments & Platforms: **Node.js**
- Content Management System (CMS): **Wordpress**
- Version Control: **Git, GitHub, GitLab**
- Development Methodologies : **Scrum.**
- Design & Prototyping: **Figma**

LANGUAGES

Spanish (**mother tongue**) - French (**professional competence**) - English (**intermediate**)

PERSONAL PROJECT

Pokédex Pokemon - React.js

Application that looks like the pokedex of pokemons - Using the reactjs framework, we make a request to the Pokemon api and display Pokemon one after the other.

Script Scraping - Node.js

Script in node.js that searches the SAQ page and returns all existing bottles of wine, indicating their price, image, name, country of origin, year and type of wine.

Development projects: Node.js - React.js - API

I'm currently working on two projects, one of which is a page connected to the API of ChatGPT. I'm also working on a real-time chat project using node js.
